

## Applications:

- Municipal
- Commercial

(1) Exposed aggregate finish, tan paint, bricklap, or other exterior options to match the surrounding environment.

(2) HVAC specifically designed for the installation site to regulate internal building temperature.

(3) Fabricated steel base with 3" reinforced concrete floor standard.

(4) Single or double door for equipment access.

(5) Sloped roof with two layers of weather-sealed protection to shed water without intrusion.

(6) Custom control panel with optional touch screen interface.

(7) Sloped concrete floor with drain.

(8) Accommodates multiple different pump styles, including the vertical multistage pumps shown.

(9) Stainless steel piping with optional flow meters, pressure sensors, and valving.
